A process is a program in execution.
The PCB holds process state.

Operating Systems - Page 2
Scheduling policies decide CPU order.
Round robin uses a time quantum.
Monday 14:00 - 15:30 Room B204
Instructor: Dr Smith
Office hours: Tuesday 10:00-12:00

Deadlock needs four conditions: mutual exclusion, hold and wait, no preemption and circular wait.
